EXAMINER'S AMENDMENT

Claims 1-6, 9-14, 17 and 18 are directed to an allowable invention. Claims 7, 8, 15 and 16, directed to alternate embodiments of the invention, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 7, 8, 15 and 16 are hereby rejoined and fully examined for patentability.

Since all claims previously withdrawn from consideration have been rejoined, the restriction requirement made in the Office action mailed on 11/30/04 is hereby withdrawn.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Mr. Ira S. Dorman, on October 14, 2005.

The application has been amended as follows:

Claim 1, line 5, "plane of said body parallel" has been changed to --plane through said body being parallel--;

Claim 1, line 13, "therebetween." Has been changed to --therebetween, said resiliently deformable bow member always being at a fixed location with respect to said plane.--;

Art Unit: 3724

Claim 9, lines 1-9, "A tension board...additionally" has been changed to --The tension board of Claim 1 additionally--;

Claim 18, line 6, "plane of said body parallel" has been changed to --plane through said body being parallel--;

Claim 18, line 14, "therebetween." Has been changed to --therebetween, said resiliently deformable bow member always being at a fixed location with respect to said plane.--.

The following is an examiner's statement of reasons for allowance: The claims disclose a tension board comprising a body having a plane extending therethrough that is parallel to the surface of the cutting table and has a resiliently deformable bow that is attached at mutually spaced points along a peripheral edge of the body, wherein the bow deforms in a lateral direction from said body and is in a fixed location with respect to the plane. Toms (2,725,978) teaches a tension board comprising a body having a plane extending therethrough that is parallel to the surface of the cutting table and had a resiliently deformable bow member attached at mutually spaced points along a peripheral edge of the body, but does not teach the bow deforms in a lateral direction from said body in a fixed location with respect to the plane. Pruonto (3,335,390) teaches a tension board comprising a body that has a deformable bow that is attached at mutually spaced points along a peripheral edge of the body, but does not teach a plane extending through the body parallel to the surface of the table, and does not teach a bow that is deformable in a

fixed location with respect to the plane. It would not have been obvious to combine the references with other prior art teachings in order to meet the claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 571-272-4509. The examiner can normally be reached on Monday through Friday between 8am and 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
